MR. HULLAH'S MUSIC HALL, LONG ACRE.—A portion of the new St. Martin's Hall, erected from the design of Mr. W. Westmacott, for the use of Mr. Hullah's singing schools, is completed, and about to be opened. We will give some particulars next week. The approaches seem very unsatisfactory; but this, perhaps, results from the fact that the design is at present but partly carried out.

ARCHITECTURAL ASSOCIATION.—At a late meeting, Mr. Charles Gray read a sensible "Review of the Present Position of Architecture." On the 1st inst., a paper was read by Mr. J. D. Wyatt, on "The Steeples of Northamptonshire."

**TO CONSUMERS of PLASTER of PARIS.**—The Advertiser is in a position to supply the above article in quantity at extreme low rates.—Particulars may be had on application.—Address, W. R. WILKINSON, Pridhoe-street, Newcastle-on-Tyne.

**ATKINSON'S CEMENT.**—This Cement has hitherto been manufactured in Yorkshire, and through long detention at sea, has often proved stale and unfit for use on its arrival in London. By the arrangement now made, the Cement will be manufactured in London, and thus transmitted to consumers in a fresh and genuine state, by the sole Agents, J. B. WHITE and SONS, Millbank-street, Westminster.

**KEENE'S and PARIAN CEMENTS,** for internal stucco, are employed very advantageously in place of wood for skirtings, architraves, and panel mouldings, and for in-door flooring instead of stone. The peculiar properties of PARIAN Cement allow of its being painted or papered upon within a few hours of its application, and thus render it an important substitute for common plastering in those cases where expedition and beauty of finish are essential.—J. B. WHITE and SONS, Millbank-street, Westminster, Patentees of KEENE'S Cement. Licensees of PARIAN Cement.

**PORTLAND CEMENT,** as manufactured by J. B. WHITE and SONS, possesses all the properties of the best Roman Cement, but has the advantage over that material of wholly resisting frost. When used as a stucco it does not evaporate or turn green in damp situations, and becomes an excellent Emplecton as an hydraulic mortar for brick-work, it requires four to five measures of sand to one of cement, and is proved by trial to become harder and stronger in these proportions than Roman Cement will bear one measure of sand. This superior cementing power, combined with its eminently hydraulic properties, point it out as the fittest material for building sea and river-defence walls, the lining of reservoirs, cisterns, and baths, and for all those purposes where strength and a perfect resistance to water are required.
Manufactory.—J. B. WHITE and SONS, Millbank-street, Westminster, and 30, Seel-street, Liverpool.

**PORTLAND CEMENT,** solely MANUFACTURED by WILLIAM ASPDIN, Son of the Patentee.—Messrs. ROBINS, ASPDIN, and Co. request reference to No. 394, page 49; and also Nos. 394 and 395, pages 343 and 361 of "The Builder," for accounts of EXPERIMENTS on the strength of Portland Cements, whereby the great superiority of their Cement is manifest. This Cement has been proved for upwards of twenty years in the Thames Tunnel to resist the action of water: it is stronger in its cementitious qualities, harder, and more durable than any other description of Cement; it does not vegetate, sprindle, or turn green; nor is it affected by any atmosphere whatever the climate, resisting alike the cold of a frost and heat. It is manufactured to set in from ten to sixty minutes. For all purposes that Cement is applicable the Proprietors challenge competition.—Orders received by Messrs. ROBINS, ASPDIN, and Company, at their Manufactory, Northfleet, Kent, and their Wharf, Great Scotland-yard, Whitehall; also by their Agent at the Depôt, 1, Back-lorne, Liverpool.

**MARTIN'S PATENT**
FIRE-PROOF AND ORNAMENTAL CEMENT,
APPLICABLE FOR
ALL INTERNAL PURPOSES WHERE PLASTERING IS REQUIRED.

This invaluable Cement has now been before the public so many years, and obtained such a standing in the estimation of all who have used it, that it is unnecessary to comment on its merits. Messrs. STEVENS and SON, however feel called upon to observe, that from the greater extent of surface which a given quantity of MARTIN'S will cover, as compared with other Cements for internal use, there will be found a saving of 50 per cent. in material, full 7 per cent. less in price, with an additional saving in labour of 10 per cent., as it is allowed by all builders, carpenters, and plasterers, that one tenth of the time of other cements of a similar nature, therefore worked with greater facility, making together the enormous saving of full THIRTY THREE PER CENT.: its advantages therefore remain almost of double.
Specimens, showing the beauty, hardness, and applicability to all plain and ornamental purposes, may be seen; and the Cement in any quantity, obtained of Messrs. STEVENS and SON, at their Plaster and Cement Works, 206, Drury-lane, London.—Manufactory, Derwent Mill, Derby.

**THE PARIAN CEMENT,** for INTERNAL STUCCO, which was supplied at Messrs. J. & R. MORLEY'S warehouse and dwelling, in Wood-street, Cheapside, in the City, has been used throughout the premises, in every story, to the extent of upwards of seven thousand yards superficial, chiefly upon recently built walls, and a small portion upon timber partitions, and that with the most perfect and satisfactory result. I feel it also necessary to observe, that the plasterer's work was almost immediately followed up on the next day by the painters, therefore enabling me to have the building completed and ready for occupation a possible time, both for business and for the occupation of the establishment. I am therefore, of opinion, that the use of this new material is a most valuable feature in building operations, and I fully anticipate that which I was given to understand, viz., that it was an extra-ordinary material. I think it right to mention, that I am at the present time having a great extent of similar work executed at another range of buildings where time and the quality of the work are of the utmost importance.
Signed) JNO. WALLEN, Architect, London.
To Messrs. Chas. Francis and Sons, Manufacturers, Nine Elms.

**EMERSON'S PATENT LIQUID CEMENT** is ready for use, is simple in its application, and only ONE-EIGHTH the cost of oil paint; for beauty it is pre-eminent over all other materials used on the fronts of houses, giving the stone appearance of FINE CUT STONE; can be used at once on fresh Roman cement or other plastering; is particularly calculated for country houses, villas, or gate entrances that have become soiled or dingy, which can be beautified in any weather, at a trifling cost.—Sold in casks of 1, 2, and 4 cwt., at 8s., 16s., and 32s. each.—6, BELL and Co., 16, Hemp-de-lane, Cheapside.
